*Dear Colleagues!*

The fourth **EastWest Chemistry Conference (EWCC 2020)** will be held from the 23<sup>rd</sup> to 25<sup>th</sup> of September 2020 at **Igor Sikorsky Kyiv Polytechnic Institute** (Kyiv, Ukraine) under the auspice of the **Turkish Chemical Society** and in collaboration with specialized institutes of the National Academy of Sciences of Ukraine.

Kyiv is a beautiful and ancient city with more than thousand years' history located at green hills of the Dnieper river and simultaneously a powerful research and educational centre of chemical science in Ukraine. The **National Technical University of Ukraine "Igor Sikorsky Kyiv Polytechnic Institute"** opening its doors for the EWCC 2020 participants is one the best and oldest educational institutions in Ukraine. The Organising committee will propose not only scientific program but the variety of opportunities to be get acquainted with cultural, historical, and social life in Ukraine.

Recognizing your valuable contribution in chemistry-oriented area, let us invite you to attend and to be the active participant of this event. The Conference was initiated by the **Turkish Chemical Society** in 2017 and has already enriched by the experience of organization in different countries (Macedonia, Ukraine, Italy). Taking into account opportunities for exchange of ideas, scientific development of young scientists, and establishing new collaborations, in this case it is also an opportunity to connect scientists of different East and West countries together.

With this in mind, the Turkish Chemical Society and Igor Sikorsky Kyiv Polytechnic Institute have joined the forces to organize **EastWest Chemistry Conference** in 2020. We welcome contributions from all branches of chemistry and related areas such as nanoscience and nanotechnology, and bio-nanomaterials. We hope that the conference will be an interdisciplinary scientific platform benefitting from all branches of chemistry.

*We are looking forward  
to see you at the  
Conference!*

*Please follow updates and  
details of future event on the  
conference or department,  
university sites:*
